Zarif Ahmed

289-880-4126 | zariftahmed@gmail.com | linkedin.com/in/zarif-ahmed1 | zarifahmed.webflow.io | github.com/zarif2142

Technical Skills

Languages & Frameworks: Python, Java, JavaScript, C++, C, SQL, React.js, Node.js, Flask, Django, Pandas
Data & DevOps: Azure, Databricks, ETL Pipelines, REST APIs, GitHub Actions (CI/CD), Test Automation (RPA)
AI/ML & Agentic Systems: Machine Learning (PyTorch), Agent Orchestration (LangGraph, ReAct), LLM Tool Calling, RAG, pgvector, Claude Code, OpenAI Codex/API, Gemini API, Prompt Engineering, Eval Harnesses

Experience

AI Task Designer / Generalist Expert Feb 2026 – Aug 2026
Fleet AI *San Francisco, CA (Remote)*

- Designed and QA-reviewed **AI evaluation tasks** across data science and enterprise workflows using **dbt, Looker, Power BI, SQL** and **data modeling**, validating **AI agent reasoning** and cross-application workflows.

Data Engineering Intern Jan 2026 – Aug 2026
Procter & Gamble *Toronto, ON*

- Engineered **8 automated data pipelines** using **Python, Azure Data Factory, and Databricks** to deliver **2,000+ POS** files daily from **Azure Data Lake**, replacing manual uploads and **saving 4,380 hours annually** while enabling instant **data quality validation** for promotional investment decisions.
- Engineered a **Django** and **Pandas** web application to automate retail deal sheet validation, migrating a **KNIME** proof-of-concept into a production-ready system. Delivered a **3x** faster one-click pipeline, saving **70+** account executives **over 1,800 hours annually** with a projected **$1M+** in 5-year savings.

Software Engineering Intern May 2025 – Dec 2025
Procter & Gamble *Toronto, ON*

- Deployed an organization-wide **security automation ecosystem** (**Python, Java, Selenium, GitHub Actions**) running daily access reviews, leaver/transfer revocations and compliance monitoring, **saving 2,600+ hours annually** and cutting per-user processing from **30 minutes to under 2**.
- Built an **RPA bulk provisioning tool** adopted by the global IT Access team, provisioning **1,300+ users, 400+ groups and 150+ service accounts with 100% accuracy** for North America's largest trade-platform migration and contributing to a **perfect 8/8 SOX audit score** (Global Internal Audit & Deloitte).
- Owned the AI build of a **Gemini vision model** POC converting smart-glasses video into structured consumer data via **prompt engineering**, a fixed-value output schema and deterministic validation; reached **98% accuracy**, adopted by an R&D team and projected to save **3,200+ hours annually**.

Security Data Analytics Intern Jun 2024 – Aug 2024
Webacy *San Francisco, CA*

- Analyzed and labeled **Ethereum smart contract vulnerabilities**, running **frequency and correlation analyses** to uncover key risk associations and prioritize high-impact vulnerabilities for security decision-making.
- Applied **unsupervised machine learning (clustering)** and data visualization tools **(Excel, Tableau)** to uncover insights into smart contract risk profiles and improve security measures.

Projects

OpenRing: Smart Ring Health Tracker | *Swift, SwiftUI, CoreBluetooth (BLE), XCTest* Sep 2026 - Present

- Implemented a smart ring's undocumented **Bluetooth Low Energy (BLE)** protocol as a standalone **Swift** package, parsing checksummed binary packets, BCD timestamps and multi-packet transfers, validated by **108 XCTest cases** at **93% line coverage**.
- Built a **SwiftUI** iOS app with an **async/await CoreBluetooth** sync layer (GATT services, auto-reconnect, background sync) that stores **7 health metrics** in **SwiftData** and charts daily-to-monthly trends with **Swift Charts**, with no vendor app or cloud.

PDF Tools | *JavaScript, WebAssembly, Web Workers, Cloudflare Workers, Claude API, GitHub Actions* Oct 2026

- Built a client-side **12-tool PDF suite** on **WebAssembly** and **Web Workers** with a **PDF-to-document editor**, plus a **Claude API** assistant on a **serverless Cloudflare Worker** with **SSE streaming** and auth.

Education

Western University London, ON
Honours Specialization in Computer Science *Graduation Date: April 2027*

- **Leadership**: Developers Society & Western AI (Software Developer), Western Wrestling **(Varsity Athlete)**
- **Interests**: Wrestling, Manga, Fantasy Basketball, Hip-hop, Mixed Martial Arts, Agentic AI
